Re: Invitation to Participate in the NetDMR Implementation

ELWHA WATER TREATMENT PLANT
826 E FRONT STREET, SUITE A
PORT ANGELES, WA 98632

Dear Permittee:

W20026662

EPA is writing to invite you to participate in the NetDMR implementation program. NetDMR is a freely available Web based application that allows NPDES permit holders to electronically sign and submit their discharge monitoring reports (DMRs) to EPA via the internet. The new electronic reporting system is designed to improve data quality, save paper, and provide cost savings for permittees and regulators.

NetDMR went live on June 22, 2009, allowing a small number of NPDES permit holders that were trained and participated in the NetDMR pilot to begin to submit their DMRs electronically to EPA. We are now in the process of adding new users and would like to invite you to participate in the NetDMR program. We are providing you with the website address for NetDMR (<http://www.epa.gov/netdmr>) so that you can become more familiar with NetDMR.

Please note, that NetDMR does have certain minimum computer system requirements (See "System Requirements" section of the Facility Information Brochure) that must be met in order to participate in the program. If you are interested in participating in NetDMR, we would ask that you please contact Ms. Diane Davis (davis.diane@epa.gov) by email and provide the following information: the name and address of the facility, the NPDES permit number, and contact information for the facility. EPA will then contact interested facilities to schedule additional NetDMR training over the next several months.

Please keep in mind that NPDES permit holders may only use NetDMR after receiving the appropriate training and requesting and receiving permission from the permitting authority, which in this case is EPA Region 10. After EPA Region 10 has approved a facility's request, the facility may begin using NetDMR to electronically submit their DMRs.

If you have any questions about NetDMR, please contact me at 206-553-1296. I look forward to working with you on this exciting project.

Sincerely,

Diane Davis
Environmental Protection Specialist
